EXPERIENCE

Frontend intern   Feb 2024 - March 2024
InternPe Web Development Training   *Rajasthan*

- Contributed to project tasks as a Frontend Intern, gaining hands-on experience in front-end web development.
- Collaborated with the development team to implement website features and enhance user experience.
- Assisted in debugging and resolving technical issues to ensure smooth website functionality.

PROJECTS

Book My Show App: Developed a full-stack "Book My Show" app using the MERN stack. Implemented user authentication, responsive UI, RESTful APIs, and integrated third-party APIs for real-time data. Deployed on cloud platforms with CI/CD pipelines, ensuring scalability. Collaborated with a team using Git for version control and conducted thorough testing.

Google Gemini-App (Clone): Developed a generative AI app using React JS and Google Gemini API: Implemented AI-driven features, including text generation and content recommendations. Designed intuitive UI/UX, optimized app performance, and integrated robust API functionalities, ensuring a seamless user experience and reliable performance across devices.
